

Organic Dairy Transition Business Planning and Risk Management Workbook

Jim Fisher

Richard Broadwith (BCI Consulting)

In Partnership With Organic Meadows Inc

Objectives:

- >To help conventional dairy farmers evaluate the risks of converting to organic production
- >To educate dairy farmers about converting to organic farming using a computerized risk management tool and workshops

Project Findings:

This project is in the development stage, with a computerized risk management template designed. Case studies and workshop development is expected this fall. Farmers will have access to this template and a workshop this winter. Organic Meadows is a leading organic dairy processor in Ontario, and is hosting this effort.

Support Appreciated from:

ORGANIC MEADOW®

Community Benefits Include: A tool to assess risk in transitioning, helping to smooth the transition to organic farming
